Crossfading In Vlc Media Player Software Requires AdvancedAdvanced video software requires advanced skills to perform even basic tasks like trimming a video.. While listening to your digital music collection, do you sometimes wish that you could have smooth transitions between songs rather than silent gaps? It can be an annoying experience that sometimes spoils your enjoyment when there are long pauses in the music until the next track gets going.

This will also allow you to easily share videos with friends and family via different mediums.. Sad for us we have to wait an hour to cut an hour scene out of a video If I can do it it has to be possible for othersjust always make a copy of the original first.. This is especially true when you have set up a large playlist of music tracks that would sound way better if they were played non-stop.. Say I want to cut a video 00:05:00 to 1:05:00 out of a two hour long video I dont want to watch the video for another hour to hit the recording button again to cut it.
